List of Figures

Figure 1: Arrebola, M. [s.a.]. *Medea*.

Figure 2: Aspicprod. 2021. *Spaceship armada 3D*.

Figure 3: Berbece, N. 2021. *FREE Controllers & Keyboard PROMPTS*.

Figure 4: Entian-Astea. 2023. *3D sci-fi radio station*.

Figure 5: Marpa Studio. 2025. *Walkie Talkie Game Prop*.

Figure 6: Yughues. 2013. *Free Metal Materials*.

Figure 7: Bicameral Studios. 2018. *Free Island Collection*.

Figure 8: Pandazole. 2021. *Kitchen Food low poly pack*.

Figure 9: Netflix. 2018. *Lost in Space*.

Coding/Shader In-Text References

The video by Game Dev Brotherhood (2024) was used to create the initial design for the water shader in shader graphs. Daniel Ilett's (2025) vertex and tessellation shader video and depth shader video were used to help bring it into HLSL code along with Roystan's (2018) toon water shader blog. Daniel Ilett's (2025) vertex and tessellation shader video was then used to add tessellation to the water plane. Lastly, Roystan's (2018) toon water shader blog was used to figure out how to do the foam for the water.

Game Dev Guide's (2020) video on compute shaders was used as a basis for how to write compute shaders. Sasquatch B Studios' (2024) video on the unity jobs system was used as a basis for how to write unity jobs. Compute shaders were used to generate the positions for the sphere colliders for the water as well as calculating the wave heights for the colliders. The unity jobs system was then used to multithread applying the new heights to all the sphere colliders transforms which improved computation speed.

Max O'Didily's (2024) video was used to learn how to make Unity's character controller stick to moving platforms. This isn't as important now, because the platforms only move up and down slightly with the waves, but it makes the game feel overall smoother and look better.

Sasquatch B Studios' (2024) video for a 2D platformer controller was used to write the jump buffer and coyote timer for our game. This was because the player would walk off the ship and it would feel like they should jump but couldn't. This made game controls feel better.
